Mobile Number Portability

Given the increasing global trend of Mobile Number Portability (MNP) that allows subscribers to retain the contact number even while changing an operator, Ushacomm has recently launched a MNP Point Solution that can streamline the challenging process of meeting any country's mobile number portability requirements for all available networks, be it Wire line or Wireless.

Ushacomm recently deployed the MNP solution for a Western African multi-play operator that has helped to increase the subscriber base to many folds within a very short span of time thus enhancing the operator's revenue. The solution takes care of all necessary validation and error handling requirements as per regulatory mandates.

Additionally, a live web-based MNP Dashboard is available that allows the operator to track & analyse the in-flow and out-flow of subscribers from/to operators on a daily, weekly or monthly basis; compare between operators in terms of in-port and out-port; and track ports that are incomplete/rejected / violating SLA mandate.

ushacomm®
(An Usha Martin Technologies Brand)

Ushacomm is the Telecom Solutions brand of Usha Martin Technologies. A global OSS/BSS provider with more than 55 installations worldwide, Ushacomm has vast experiences in developing, consulting, implementing & maintaining high end IT solutions for the Telecom Industry.
