

## Least Cost Routing

International carriers and Operators have to efficiently handle the wide range of Interconnect options based on inter operator agreements for routing and terminating their traffic to ensure that they don't compromise on margin performance while delivering quality of service to the subscriber.

The Ushacomm Least Cost Routing solution helps operators automatically determine the most optimal route for subscriber calls & route information to switches, based on detailed analysis of key parameters like route capacity, route cost, Quality of Service, recent call load etc. Consequently, this enables informed & efficient decision making with optimized margin performance for the Telco.

The Ushacomm Least Cost Routing solution is available as an add-on as well as integrated with it's industry leading Interconnect Billing System - Balios.

Ushacomm is the Telecom Solutions brand of Usha Martin Technologies. A global OSS/BSS provider with more than 55 installations worldwide, Ushacomm has vast experiences in developing, consulting, implementing & maintaining high end IT solutions for the Telecom Industry.
